

COMPANY PROFILE

— water deserves to be managed

ABOUT US

ABOUT HKS

HKS is driven by a simple purpose- To help save water where most water wastage occurs by using proven filtration, irrigation and fertigation, water fountain science and market leading technology.

With more than 19 years of experience, we provide a total solution to maximize landscape beauty while saving billions of gallons of water

ABOUT US

VISION, MISSION & VALUES

MISSION

To be recognised as the trusted choice in providing smart water saving designs and solutions for the people of tomorrow.

VISION

Leveraging on the ever-evolving technology to develop a premium and cutting-edge water conservation solution to secure our future generation's livelihood.

VALUES

HKS Engineering & Trading Pte Ltd places the highest priority in delivering superior quality products and fostering strong customer relations.

ABOUT US

OUR CERTIFICATES & RECOGNITIONS

QEC CERTIFICATION
CERTIFICATION
Environmental Management System

Certificate of Approval
 This is to certify that the EMS of
HKS ENGINEERING & TRADING PTE LTD
 51 Ubi Avenue 1 #05-30 Paya Ubi Industrial Park,
 Singapore 408933
 Has been assessed and found to meet the requirements of
ISO 14001:2015
 This certificate is valid for the following scope of operations
 Provision of Mechanical and Electrical Engineering Services Including
 Design & Build Irrigation System & Water Feature System

Authorised by: **R N Cooke**
 Director

Date of Certificate Issue: 31 October 2022
 Certificate Valid Until: 30 October 2025
Recertification audit before 30 September 2025. Certificate since 31 October 2022. This certificate is the property of SN Registrars (Holdings) Limited and remains valid subject to satisfactory annual surveillance audits.

08. PIPING SYSTEM

PRODUCTS & SERVICES

01 SMART IRRIGATION SYSTEM

Smart irrigation systems are a combination of an advanced technology of sprinklers with nozzles that improve coverage and irrigation controllers that are watering and water conservation systems that monitor moisture-related conditions on your property and automatically adjust watering to optimal levels.

PRODUCTS & SERVICES

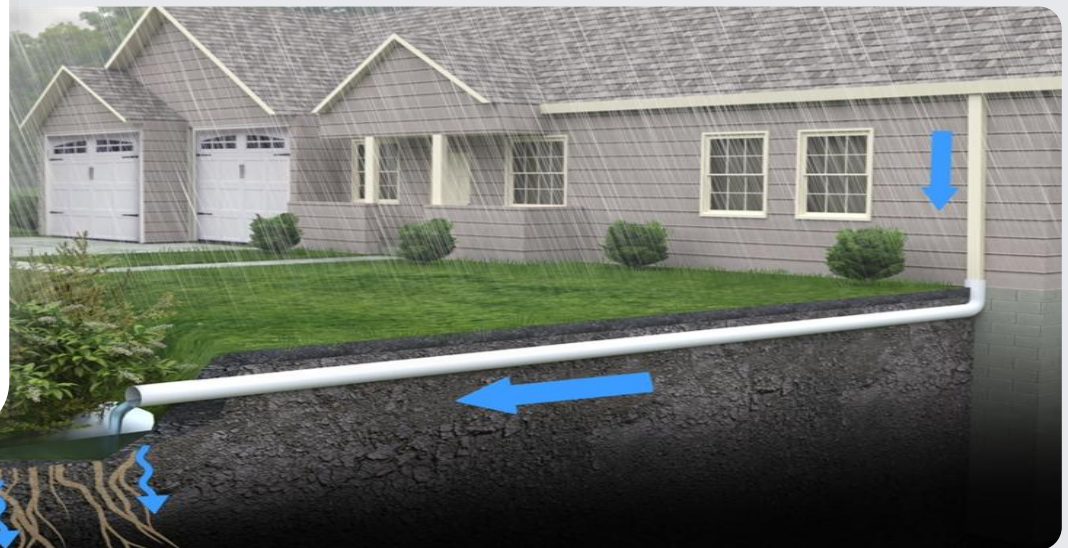

PRODUCTS & SERVICES

02 RAINWATER HARVESTING SYSTEM

Rainwater harvesting system, also called rainwater collection system or rainwater catchment system, technology that collects and stores rainwater for human use. Rainwater harvesting systems range from simple rain barrels to more elaborate structures with pumps, tanks, and purification systems.

Rainwater harvesting system save water and money, reduces soil erosion and flood hazards by collecting rainwater and reducing the flow of stormwater to prevent urban flooding.

PRODUCTS & SERVICES

PRODUCTS & SERVICES

03 SMART IOT INTEGRATION SYSTEM

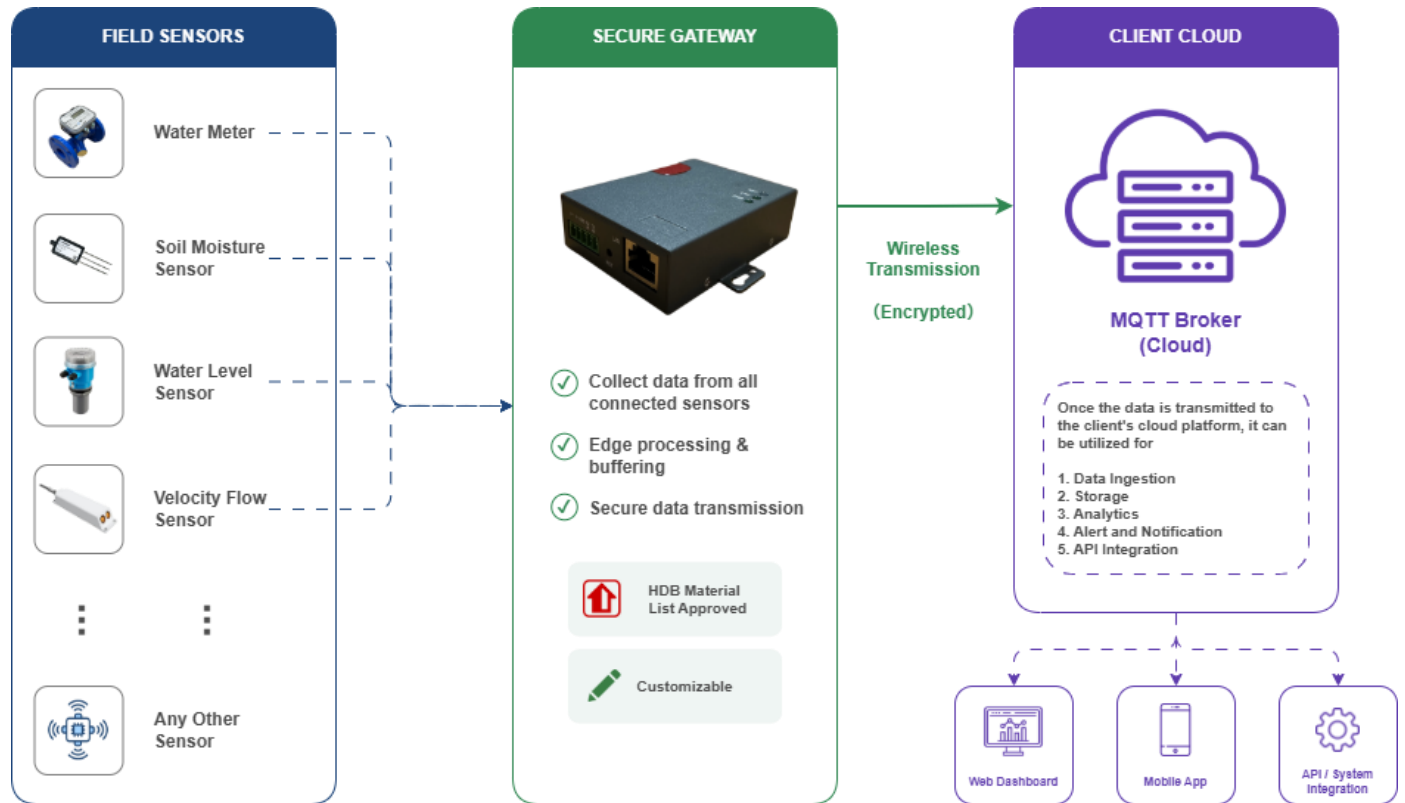

We are bringing Industrial and Building IoT integration to the next level by creating the ability to transfer data over a network without requiring human-to-human or human-to-computer interaction. Together with the use of artificial intelligence (AI) and machine learning to aid in making data collecting processes easier and more dynamic and automate daily work flow.

With IoT Integration, we are able to allow our customers to operate more efficiently, better understand their needs to streamline operations, improve decision-making and increase the values bring forth to our customers.

PRODUCTS & SERVICES

SMART IOT INTEGRATION SYSTEM

SOLUTION FRAMEWORK

From Sensors to Insights — Secure, Seamless, Smart

Field sensors connect to the Gateway, which securely transmits data via 4G to the client's cloud. The cloud platform enables storage, analytics, alerts, and integration with client applications — ensuring reliable, real-time insights.

OUR PROJECTS

Institute of Technical Education

PRODUCTS & SERVICES

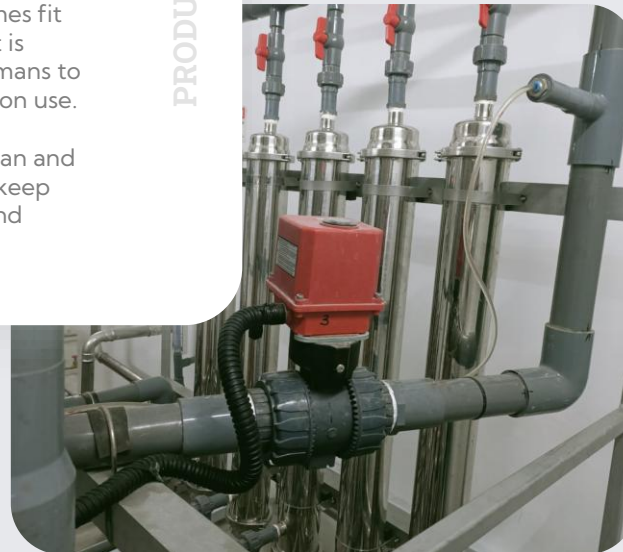

04 WATER TREATMENT SYSTEM

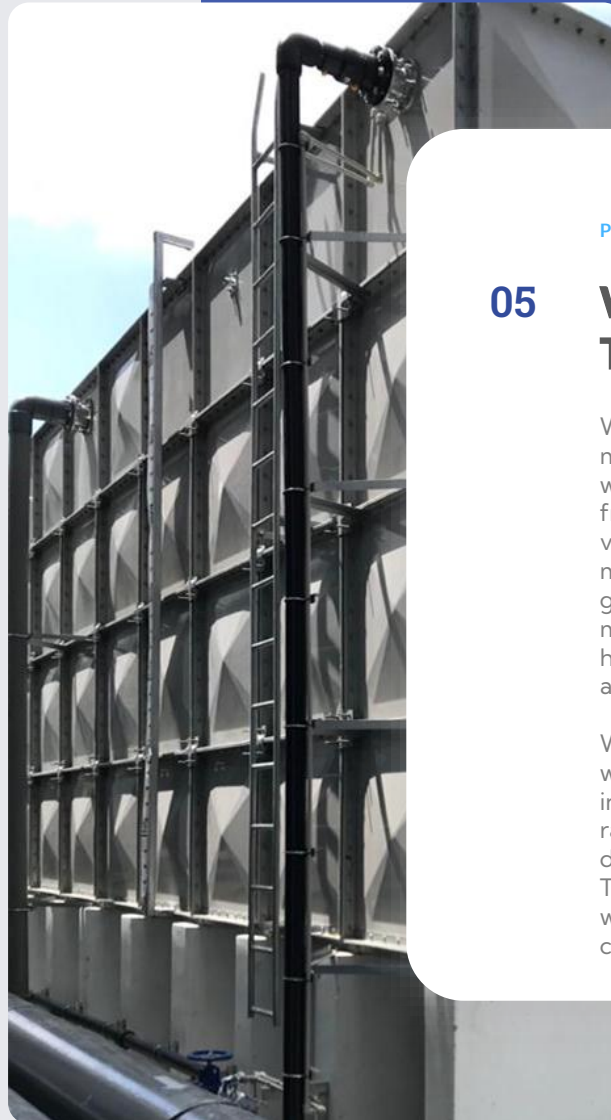

Water treatment system is any process that improves the quality of water to make it appropriate for a specific end-use. The end use may be drinking, industrial water supply, irrigation, river flow maintenance, water recreation or many other uses, including being safely returned to the environment. Water treatment removes contaminants and undesirable components, or reduces their concentration so that the water becomes fit for its desired end-use. This treatment is crucial to human health and allows humans to benefit from both drinking and irrigation use.

Water Treatment system provides clean and reusable water, protect environment, keep disease away, strengthens economy and produces energy.

PRODUCTS & SERVICES

PRODUCTS & SERVICES

05 WATER PUMP & TANK SYSTEM

Water pump system is an electromechanical machine used to increase the pressure of water to move, compressing, or transfer it from one point to another. There is a wide variety of water pumps available to suit many different purposes and needs. A general rule of thumb a water pump is mainly utilized to minimise downtime from heavy rains and to move water from area to another.

Water tank system is a storage solution for water, used for domestic, agricultural, and industrial purposes. Water tanks come in a range of materials, shapes, and sizes, depending on the intended use of the tank. The main role of a water tank is to store water before it is used for drinking, washing, cleaning, irrigation and so on.

PRODUCTS & SERVICES

PRODUCTS & SERVICES

06 WATER FOUNTAIN SYSTEM

Water fountain system a design element where open, artificially supplied water performs an aesthetic or recreation feature. Water fountain system help stress relief & relaxation, act as natural humidifiers, improve the air with negative ions and cooling effects

PRODUCTS & SERVICES

PRODUCTS & SERVICES

07 SMART FERTILIZING SYSTEM

Smart fertilizing system is a method of fertilizer application in which fertilizer is incorporated within the irrigation water by the drip system. It delivers just right combination of water and nutrients directly to the roots of each plant, according to the crop development cycle.

Smart fertilizing system save fertilizer, accurate fertilization, meet the demand for plant growth, improve quality, output, reduce labour, energy consumption and automatic management

PRODUCTS & SERVICES

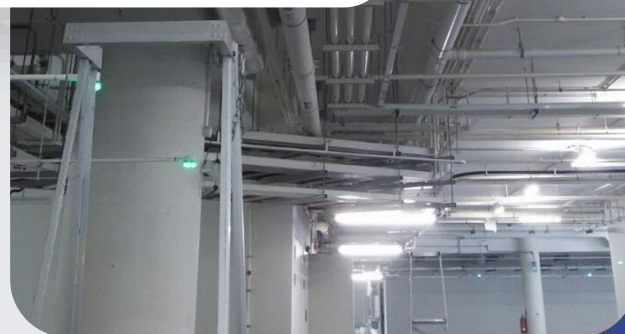

PRODUCTS & SERVICES

PRODUCTS & SERVICES

08 PIPING SYSTEM

Piping system is generally considered to include the complete interconnection of pipes, including in-line components such as pipe fittings and flanges. Pumps, heat exchangers, valves and tanks are also considered part of piping system.

Piping systems are the arteries of our industrial processes and the contribution of piping systems are essential in an industrialized society.
